HOTEL BELLECLAIRE
NEW YORK

Broadway at 77th St.
Surface Cars at Door
Subway at 79th St.

Only a few minutes from the Shopping and Theatrical District.

James J. Montague, who writes so cleverly for the New York American, recently printed a poem entitled "A Plea for Pie."

He told Mr. Hoover that it was all right to deny ourselves steak and sausage ration to help to save the nation; to eat gray bread instead of white, because with every bite we'd help to lick the German—and then he said:

"But pie is something else again. It has a rare, benignant power To elevate the spirits, when They falter in a trying hour. At breakfast, luncheon, dinner time, Its spicy tang and matchless savor, Uplift the downcast hearts of men And make them steadier and braver."

"Cut down our chops, cut down our ham. Reduce our roasts, dilute our gravy. We know it helps old Uncle Sam To feed the army and the navy. But if you take away our pie, Which is our rock and our foundation, You'll leave us stranded high and dry Upon the shore of desolation."

We join Mr. Montague in his plea for pie—because Apple Pie, Custard Pie, Lemon Meringue Pie, Pineapple Pie, and soon to come along Peach, Huckleberry, Blackberry and Raspberry Pies—are stand-bys of the Belleclaire, just loved by guests because of their "rare benignant power."

Look For These Features

DOMESTIC Science and Ideal Fireless Cookstoves have these features which you will find in no other fireless cookstove: Patented Water Seal Top, which locks the heat in the cooking compartment. Patented Steam Valve, which regulates the escape of steam and conserves the heat. Cooking compartments of extra strong, durable aluminum, absolutely seamless. Scientific Strata-laid insulation which imprisons heat and resists atmospheric influence.

Domestic Science Fireless Cookstove. Steel cabinet, with handsome enamel finish. Full equipment of Ideal Aluminum cooking utensils. Radiator thermometer.

Ideal Fireless Cookstove. Solid oak, cabinet-built case, specially vulcanized. Full equipment of Ideal Aluminum cooking utensils. Radiator Thermometer.

Think How Much Fuel We Could Save By Using Fireless Cookstoves

WHEREVER women are trying to conserve fuel there you will find much of the cooking done in Ideal or Domestic Science Fireless Cookstoves. Women who are studying household economies carefully have learned that these fireless cookstoves will do any kind of cooking that a range will do, and use only a small fraction of the heat that a range consumes.

They have found out that an Ideal or Domestic Science will roast meats a beautiful brown, that it will bake pies and cake and bread just as well as a range, that it does quick cooking and cooking requiring long, slow heat equally well; that it prevents meat shrinkage and the loss of valuable mineral salts in vegetables; that it cooks thoroughly and never burns foods.

The Ideal and Domestic Science will do all these things because of definite superiorities of construction—special features that no other fireless cookstove has. Ask your dealer about them; or write us for a beautiful booklet, telling about modern fireless cooking, with recipes and photographs in colors of fireless cooking results.
